WHAT IS TCC?

It is a membership club, created to revolutionize the trading market of digital coins.

In a competitive billion dollar market to which only a few have the access to, TCC's software is developed by a specialized team bringing the opportunity to anybody to start in the trading market of digital coins, obtaining automated gains in three levels of risk, with little or no skills in the trading world.

WHAT IS TRADING?

It is a type of negotiation that takes place in the financial markets, intensively using sophisticated technologic tools to get information of the market and use it to exchange financial securities such as assets or options.
